Newsletter 4

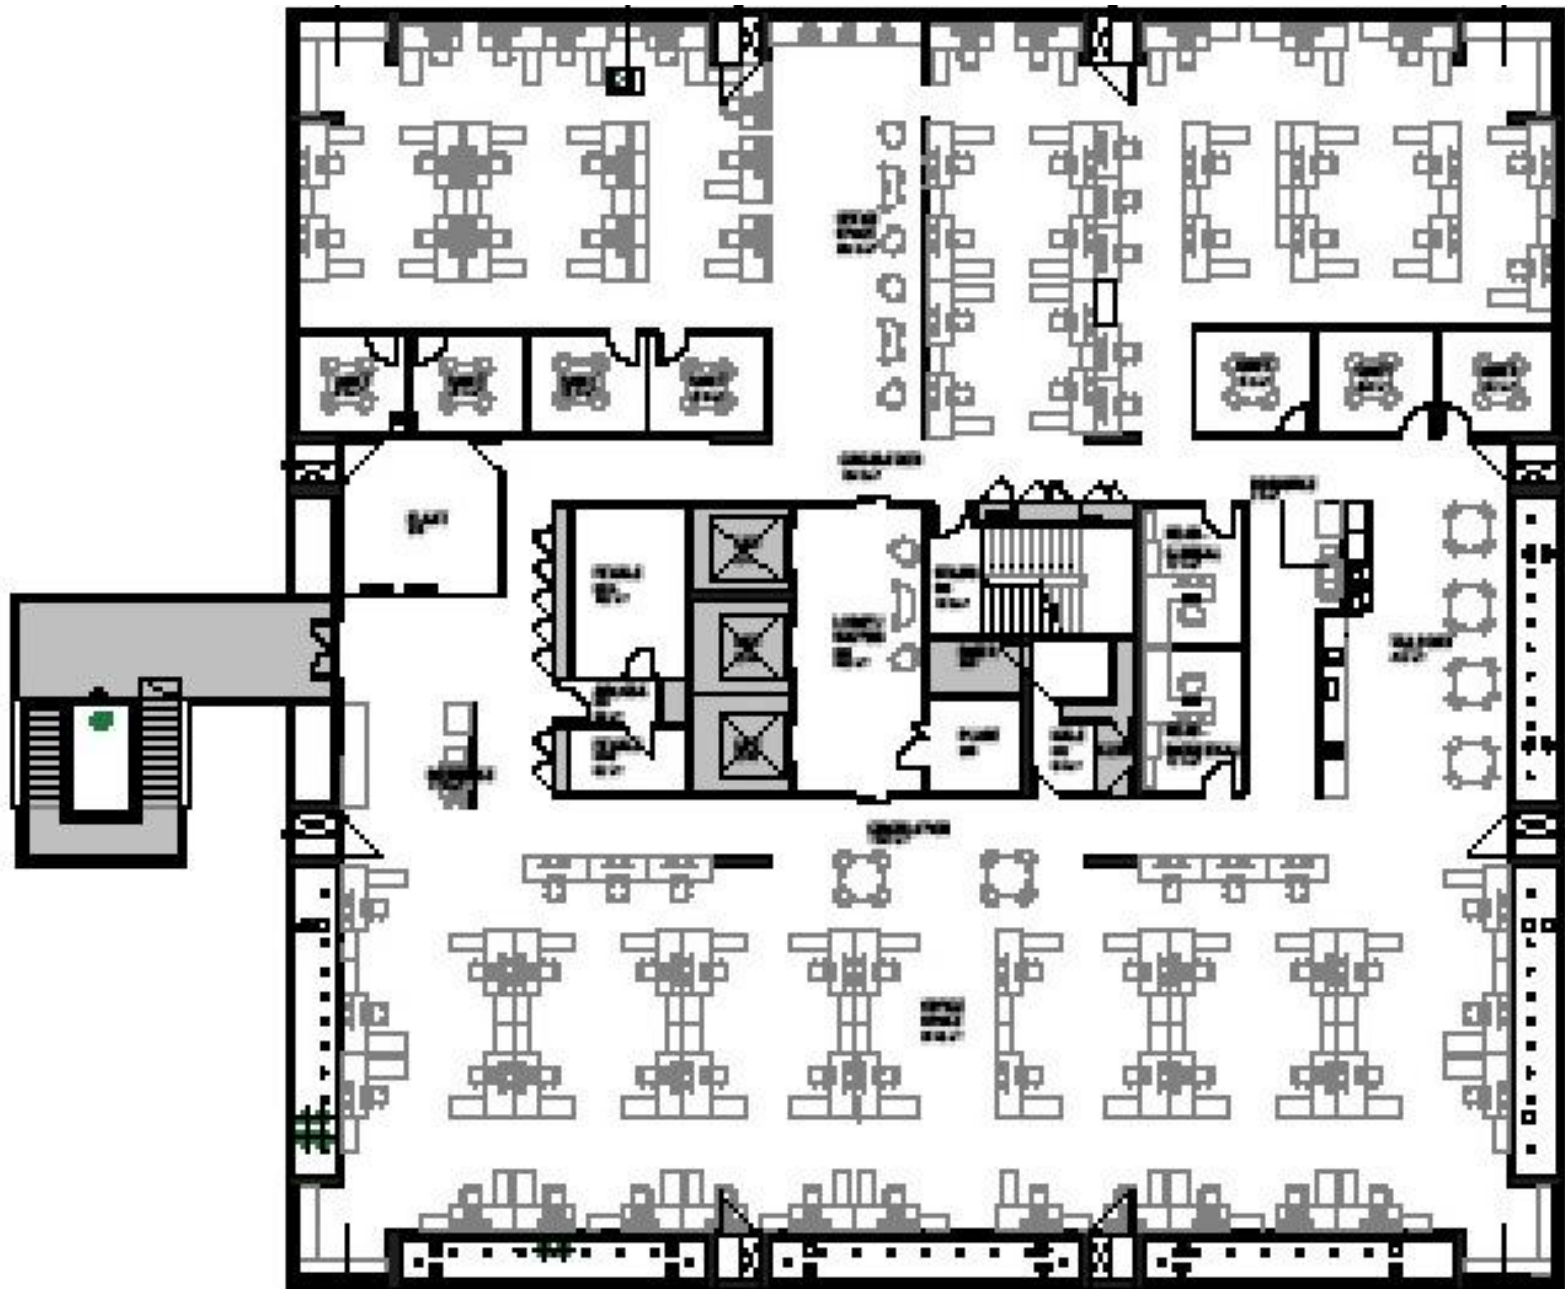

29 July 2014

This newsletter marks the final stage of the architectural design and outcomes the schedule of works floor by floor. We also introduce Jim and Michelle, the senior members of the team who are ensuring a well-designed and efficient project. We thank staff for their co-operation in the smooth transition to G Block, where you can also see the planned work stations. The next semester will be a busy and exciting one as construction progresses and new equipment arrives. We look forward to informing you of this progress and responding to any issues that arise.
